Aquoral™ is a lipid-based solution resembling human saliva designed to moisten and lubricate the oral cavity, including the oral mucosa of the mouth, tongue and throat, by formation of a lipid film which limits loss of water and restores the viscoelasticity of the oral mucosa. Aquoral™ also provides protective action against further inflammation of the oral mucosa. Xerostomia (dry mouth) has harmful effects on the oral cavity and quality of life; consequently, management of dry mouth is primarily based on relief of symptoms.

Aquoral™ is delivered in a Aluminum canister with 0.1 mL spray pump containing 40 mL (net content) of solution which corresponds to 400 sprays of Aquoral™ (NHRIC 8546.0001.40). This medical device complies with the requirements of the Directive 93/42/EEC.
